## PROJECTS

### Voyager — [live](#) | [github](#)

A full stack url shortener made with NodeJS, MongoDB, Svelte and p5. Assets created in Adobe Illustrator and Photoshop. Uses OAuth to protect the POST endpoints.

### Bookwise — [live](#) | [github](#)

A full stack knowledge management service made with NodeJS, GraphQL, Postgres, and Svelte. Uses Google Books API when adding new books to the database.

### EvalGuessr — [live](#) | [github](#)

A chess game that allows you to guess the current evaluation of a given chess position. Part of a one-weekend build challenge, it was built with React and NodeJS and uses Stockfish for evaluation and the Lichess API to pull played games.

## EXPERIENCE

### Document Imaging Specialist, *CrossFirst Bank*

September 2017 - December 2020

- Developed a web app utilizing HTML, CSS, JavaScript, NodeJS, MYSQL to log loans completed
- Programmed an automated spreadsheet in VBA to deliver workloads of thousands of loans to newly remote cross functional teams

### Deputy State Director, *Obama for America*

June 2012 - January 2013

- Operated the front of Kansas Headquarters and raised tens of thousands of dollars
- Trained 9 Team Leads and hundreds of volunteers which led Kansas to exceed all metrics by an average of 180%
- Drafted and executed a GOTV plan to take 105 volunteers to 17 locations over 4 days

### Congressional Aide, *United States House of Representatives*

May 2008 - May 2009

- Designed new tooling to streamline data entry methods to speed up workflow by 5 times
- Documented these changes by authoring a new training handbook for all future interns
